POLLINO PLAST

If you need assistance with product selection or additional information about our range, we are at your disposal. Contact us, and our team will provide fast and professional support.

POLLINO PLAST

A MODERN COMPANY ENGAGED IN THE PRODUCTION OF PLASTIC PRODUCTS FOR AGRICULTURE, IRRIGATION, AND LOGISTICS.

ABOUT US

POLLINO Plast is a manufacturer based in Šimanovci, specializing in plastic products for industrial and agricultural applications. Our range includes box pallets, plastic pallets, crates, mulch films, irrigation tapes, PE pipes, fittings, and accessories, all produced in accordance with international quality standards.Radimo u skladu sa međunarodnim standardima kvaliteta i bez kompromisa ulažemo u pouzdanost svakog proizvoda.

We were founded with a clear vision—to provide reliable, durable, and high-quality products that improve production and simplify operations for agriculture and industry. Today, supported by modern technology and continuous development, our product range sets high standards across the region.

OUR OFFER

- We manufacture plastic products for agriculture, irrigation, and logistics.
- We develop complete solutions for drip irrigation systems.
- We produce high-quality packaging and crates for fruit, vegetables, and the food industry.
- We offer customization and technical support tailored to customer needs.
- We apply ISO standards.

OUR PRODUCT PROGRAM

Our product range is based on modern technology, precision manufacturing, and high quality standards. All processes are designed to deliver reliable solutions that meet the demands of modern agriculture and industry. We continuously improve materials and production techniques to offer more durable, efficient, and stable products. Our goal is for every element of the range to deliver value, safety, and superior performance in real-world applications.

AGRICULTURAL FILMS

Soil stability and optimal conditions for every crop.

Our range includes mulch films in various types: black, transparent, smoke-colored, and specialized films for specific crops. These films regulate moisture, stabilize soil temperature, and significantly reduce weed growth. UV stability and high-quality structure ensure long-lasting and reliable performance in field conditions. They are ideal for vegetable crops, greenhouse production, and intensive growing systems.

IRRIGATION SYSTEMS

Efficient and precise water distribution for every production system.

Our range includes drip irrigation tapes, PE pipes, pipes with integrated drippers, and layflat hoses in various dimensions. We offer a wide selection of fittings, connectors, valves, filters, and sprinklers for complete irrigation solutions. The systems are designed to ensure uniform water distribution, stable flow, and high efficiency. Our solutions are suitable for all types of crops—from greenhouses and orchards to open-field agriculture.

PLASTIC PACKAGING AND PALLETS

Professional solutions for storage, transport, and the food industry.

We manufacture box pallets, plastic pallets, and professional crates for fruit, vegetables, and the food industry. Our packaging is made from high-quality materials and is resistant to heavy loads, moisture, and temperature changes. E-2 crates, loaf trays, and other containers are suitable for hygienic use and direct contact with food. The range is designed for efficient storage, transport, and handling in various industrial environments.

MULCH FILM – For Watermelons

A MULCH FILM THAT PROVIDES WARMER SOIL AND SUPPORTS FASTER INITIAL GROWTH AND STRONGER WATERMELON DEVELOPMENT.

The mulch film retains heat in the soil and provides ideal conditions for the early development of watermelons. It reduces moisture loss, ensuring stable and consistent plant nutrition throughout the entire growth cycle.

It prevents weed growth and directs the plant's energy toward the formation of stronger fruits. It ensures earlier, higher, and better-quality watermelon yields under all production conditions.

MULCH FILM – Lettuce Crops

A BLACK MULCH FILM THAT PROVIDES CLEAN, WARM, AND STABLE SOIL, IDEAL FOR LETTUCE CULTIVATION.

The black mulch film prevents weed growth and allows lettuce to grow faster and more uniformly. It retains moisture in the soil, reducing the need for frequent irrigation and maintaining stable moisture levels around the roots. It helps maintain optimal soil temperature, contributing to healthier and stronger plant growth. This film ensures cleaner crops, faster production, and higher-quality lettuce heads.

MULCH FILM for Strawberries

A MULCH FILM PROVIDING A CLEAN, WARM, AND OPTIMAL ENVIRONMENT FOR HIGHER STRAWBERRY YIELDS.

Mulch film for strawberries prevents contact between fruit and soil, keeping them clean and healthy, while effectively suppressing weeds and directing plant energy toward fruit development.

It retains moisture and stabilizes soil temperature, supporting stronger roots and earlier strawberry formation. The result is larger, more uniform, and higher-quality strawberries with reduced water use and easier crop maintenance.

MULCH FILM

A VEGETABLE MULCH FILM PROVIDING IMPROVED GROWING CONDITIONS AND STABLE CROP DEVELOPMENT.

Vegetable mulch film provides reliable soil protection and creates optimal conditions for faster initial plant growth. It reduces weed growth and retains moisture, ensuring uniform plant nutrition throughout the entire growth cycle. It helps maintain stable soil temperature, increasing the vitality and resilience of vegetable crops. It is ideal for a wide range of vegetables such as peppers, tomatoes, lettuce, cabbage, and other crops.

AQUASTAR

A PROFESSIONAL DRIP IRRIGATION TAPE THAT ENSURES UNIFORM IRRIGATION AND OPTIMAL WATER CONSUMPTION.

Aqua Star is a drip irrigation tape with integrated flat drippers, designed to ensure uniform water flow. It is made from high-quality polyethylene with high resistance to UV radiation. Aqua Star provides precise soil moistening and optimal water consumption.

It is available in various thicknesses, dripper spacings, and roll lengths. It is suitable for greenhouses, gardens, orchards, and open fields. Designed to reduce the risk of clogging, it ensures stable performance throughout the entire season. Aqua Star is a reliable solution for both professional and hobby growers seeking efficient irrigation.

POLLINO PLAST

POLLY AQUA TAPE

A DRIP IRRIGATION TAPE WITH A LABYRINTH SYSTEM FOR PRECISE AND EFFICIENT IRRIGATION.

Polly Aqua Tape is a drip irrigation tape with an integrated labyrinth system that ensures stable and uniform water flow. It is made from high-quality polyethylene with increased resistance to UV radiation. Designed for professional vegetable and field crops, it is suitable for both open-field cultivation and greenhouse production.

It is available in various dripper spacings, flow rates, and roll lengths, adapted to different crops. The labyrinth design reduces the risk of clogging and ensures reliable operation throughout the entire season. The tape is easy to install and suitable for surface installation. Polly Aqua Tape represents an economical and efficient solution for precision irrigation.

POLLINO PLAST

POLLY ROUND PIPE

AN ADVANCED DRIP IRRIGATION HOSE THAT ENSURES PRECISE AND UNIFORM IRRIGATION UNDER ALL FIELD CONDITIONS.

Polly Round Pipe is a durable drip irrigation pipe with integrated cylindrical drippers featuring double perforation. It is designed to ensure stable and uniform water flow even on sloped terrain. Its four-outlet emitter design provides even moisture distribution around the root system.

It is available in various flow rates, dripper spacings, and diameters, adapted to different crops and conditions. Polly Round Pipe is a reliable, long-lasting solution for orchards, vineyards, and perennial plantations. Thanks to its increased wall thickness and UV resistance, the pipe is ideal for multi-season use in demanding conditions.

LAYFLAT

LAYFLAT HOSES AND FITTINGS ENSURE SAFE, STABLE, AND EFFICIENT WATER TRANSPORT IN AGRICULTURE AND INDUSTRY.

The hoses are durable, flexible, and designed to operate under high pressure, while connectors, clamps, and end fittings ensure fully reliable connections.
All components are compatible and allow for quick installation, without leaks or pressure loss.

The system is easy to install and ideal for pumps, main lines, and drip irrigation installations. Thanks to its high resistance and long service life, layflat systems represent a professional choice for demanding terrain and intensive use.

FITTINGS

FITTINGS FOR SAFE AND STABLE PIPE CONNECTIONS IN IRRIGATION SYSTEMS.

The fittings range provides a complete and reliable solution for pipe connections in irrigation systems. High-quality manufacturing ensures stable sealing and prevents pressure loss during operation.

A wide variety of fittings allows easy adaptation to different installations and field conditions. They are easy to install and maintain long-term safety and efficiency of the entire system.

CONNECTORS, FITTINGS, AND CLAMPS FOR IRRIGATION SYSTEMS

Connectors provide safe, stable, and watertight connections of PE pipes in irrigation systems. They are available in a wide range of equal, reducing, T-connectors, elbows, and threaded fittings, making them adaptable to all types of installations. Made from high-quality materials, they ensure long service life and reliable performance under various conditions.

FITTINGS

RELIABLE FITTINGS FOR SAFE, STABLE, AND FULLY WATERTIGHT CONNECTIONS IN EVERY SYSTEM.

Fittings are key components in irrigation systems, designed for secure joining, branching, and connection of pipes and hoses. They are made from high-quality materials that ensure tight sealing, pressure resistance, and long service life.

Thanks to precision manufacturing and easy installation, fittings ensure reliable operation of every system - from main lines to drip irrigation installations. They provide optimal functionality and stability under all operating conditions.

FILTERS

IRRIGATION FILTERS THAT ENSURE STABLE FLOW, RELIABLE PROTECTION, AND LONG-LASTING PERFORMANCE.

Filters are the first and most important protective component of every irrigation system, as they retain sand, silt, gravel, and other particles that could clog drippers, sprinklers, and valves, ensuring uninterrupted operation of the entire installation.

A properly selected filter ensures optimal water distribution throughout the entire system, protects sensitive equipment components, and enables farmers to achieve reliable, efficient, and long-term sustainable irrigation without the risk of clogging.

FILTERS AND SPRINKLERS FOR RELIABLE AND EFFICIENT IRRIGATION

They are made from high-quality materials that ensure long service life and stable operation under various conditions. They are intended for agricultural producers who require precise flow control and maximum system efficiency.

IMPACT SPRINKLERS

SPRINKLERS PROVIDE UNIFORM WATER DISTRIBUTION AND EFFECTIVE COVERAGE OVER LARGE AREAS.

Sprinklers ensure uniform irrigation of large agricultural areas using fine water droplets. They are designed to cover a wide radius and provide stable, even moisture distribution under all conditions.

They are suitable for gardens, greenhouses, nurseries, lawns, and open-field crops requiring controlled plant hydration. Thanks to precision manufacturing and high-quality materials, sprinklers provide long-lasting and reliable performance in professional agriculture.
